

INTEGRITY

PEARL OF THE SEA

INTEGRITY... enjoy life on your Integrity

2023

Comfortable, seagoing trawlers

Integrity trawlers will take you to your dream destination.

The displacement hull ensures a comfortable ride, also when you will encounter strong winds.

The Integrity series suitable for sea and canals. Height maximum 3.50 metres

- Wide gangways with strong stainless steel railings gives a safe feeling on deck.
- The roof above the gangway and reardeck gives you protection from the sun and ...rain.
- A sliding sidedoor at the helmstation enables you to dock your boat in an easy way.
- There are side doors in the railing for easy boarding.
- The windows have a protection against the incoming sun.
- A large anchor locker with space for fenders and anchor chain.
- The electric anchorwinch helps you easy anchoring.
- The anchor CQR is made of SS.

The cabins offer a maximum of comfort and luxury

- Finish of walls and ceiling in wood and vinyl up to your wish.
- Wooden floors up to your choice.
- Comfortable beds in length of at least 2 metres.
- Lots of storage space under the beds.
- Led illumination in ceiling and lightstrips under the beds for a cosy atmosphere.
- Bathrooms with separate shower and electric toilet.
- Corian tops in bathroom and showerfloor.
- All cabinets have lights inside when opening the doors.
- Sound speakers build-in the ceiling.

Large reardeck with easy access to the saloon by “hopper windows“ or sliding door

- The reardeck gives you a lot of space to relax.
- The floor is layed in teak and gives a warm touch.
- There are comfortable seats with underneath storage space.
- The upholstery comes standard.
- A backdoor to a large swimplatform and a hot & cold outdoor shower at the transom.
- The table can be lowered to create an extra sleeping possibility.
- The hatch to the storage is big enough to stow your bicycles or others.

Semi-custom build

Your ideal design & technique

All our ships are semi-custom build. Choice of woodfinish, interiordesign and choice of the technique. Our dealer is open for your comments. We only install top-brands, like Webasto, Waeco, Raymarine, Victron, Cummins and others.

Proven displacement hull with class leading beam. A number of our boats have travelled many thousands of sea miles. The seakeeping abilities of our range is without question. Our hulls are laid up to survey standard along with vinylester layers for strength, durability and osmosis protection. The full length keel assists with stability while offering protection to the propellor.

Our customers comments

The 440 Sedan is just so easy to handle, whether I'm on my own or for my wife and I. Its easy to drive and simple to berth, with the windows and helm door making it easy to see all that's around.

We have found the 47XL to be very seaworthy having experienced some rough seas of the coast, the boat has handled them with ease. They are a very beamy stable boat meaning they are great underway even if you still want to move about the boat.

The 340SX Sedan ticked all the boxes for us. We were looking for something designed for entertaining but is also safe at sea with good seakeeping. The walk around side decks of the 340SX are great and the open plan layout from the saloon to the cockpit was just perfect for what we wanted. We also thought that the SX profile was classic and very elegant and easy able to fit under the bridges if you travel through canals and rivers.

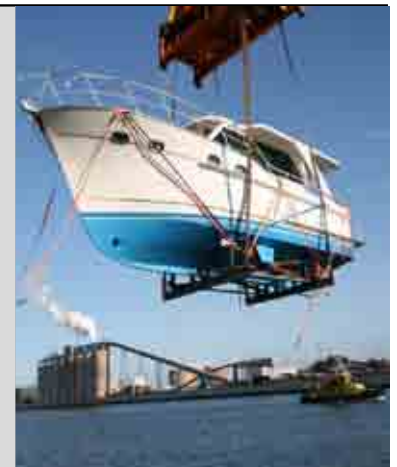

Seatransport of your ship

All services to transport your ship from the factory in China to Rotterdam in the Netherlands will be arranged.

The transport is fully ensured and the storage of the ship is always below decks on large container vessels.

We make sure after several seatrials your ship will be delivered at the harbour of your choice, anywhere in Europe.

Come and see our factory, you are welcome

The factory is in the Guangzhou area, only 2 hours by speedferry from the city of Hong Kong.

We arrange for you hotel accommodation and transport to the factory.

More than 30 years experience in building polyester yachts in sizes from 30-80 feet. Invest in a trusted brand. Integrity, Jianghua Marine is the leading displacement yacht builder in China with export to many countries in the world.

Swanta-yachting is the contact for Europe and your contact during production.

Ask for the special terms to get a ticket to our factory.

The Coastal Express series offering serene styling, unmatched comfort in combination with exceptional performance.

They are very spacious ships and like all our models, very well finished with seaworthy hulls and an economic fuel consumption.

All ships are CE-B or A certified by HPI. Boats between 2.5m and 24m in length must conform to the RCD in order to be sold/used in Europe (and a growing list of non-EU countries). The Directive also requires engines & some boat components to be CE marked in their own right, if they are to be fitted to recreational craft.

Integrity 340SX

Volvo D4 230HP 12kn(option)

Introducing the NEW SX models

Complementing the Classic Integrity Motor Yachts, the new SX range features a slew of exterior styling modifications designed by leading Naval Architect & Designer Misha Merzliakov, to appeal to a new generation of boating families. While maintaining the key Integrity DNA of spacious entertainer's layouts, undercover cockpit and side walkways for easy access, as well as reliable and economical displacement cruising, the new SX range – comprising 340 SX, 380 SX, 460 SX and 510SX models – will embody an enhanced elegance, blending the timeless appeal of traditional trawler style attributes with mid-century automotive cues, sophisticated geometry and a variety of materials. Building on the single engine reliability and efficiency all Integrity motor yachts deliver, the SX range will offer electronic engine options. The new SX Range is a deliberate and successful fusion of the classic lines Integrity is renowned for and contemporary stylistic elements that will be attractive to young families and hip Baby Boomers, adding to their ability to personalize their Integrity
